

## CARB-X ODA Justification Form

To be eligible for Official Development Assistance (ODA) funding, CARB-X projects must be primarily and directly relevant to public health needs and development goals in the [low- and middle-income countries on the OECD-DAC list](#). This form gives you an opportunity to set out how your research will have a positive impact on the economic development and welfare of people in these countries.

Please refer to [ODA Considerations for CARB-X Funded Projects](#) to assist you.

**Basic project data** (please complete):

Applicant name (organization):

Project name:

Target technology or product(s):

Target pathogen(s):

**ODA justification** (please complete, adding as much data and information as you need to each box, in order to support your case):

1. **Please explain how your research is relevant to the burden of disease, and specifically the burden of anti-microbial resistance, in countries on the [OECD-DAC list](#).** (You should cite evidence such as data and reports from the World Health Organization and/or US Centers for Disease Control, surveillance data from sources such as the Global Antimicrobial Resistance Surveillance System (GLASS), and research results documented in published journals.)

2. **Please explain how your project will be of PRIMARY benefit to low- and middle-income countries (LMICs) on the [OECD-DAC list](#).** (Refer to section B2 of [ODA Considerations for CARB-X Funded Projects](#). You may want to consider accessibility (e.g., ease of administration and use) and affordability (e.g., cost of goods). Please note: while LMICs ('Developing Countries') should be the primary beneficiaries, the research can also be relevant and have secondary benefits for other countries).

3. **Will you be engaging any research institutions in countries on the [OECD-DAC list](#) in your project?** (For example, by partnering with them to collect isolates, gather data or conduct

trials.) If so, will your project include any support to those institutions to build their research capacity?

4. **Does your project intend to create wider socio-economic benefits for countries on the OECD-DAC list, for example through the transfer of technology, sharing of knowledge, or out-licensing of intellectual property for further product development or manufacture?**

5. **Please describe your pathway to impact in LMICs on the OECD-DAC list. What are the key steps to achieving the objectives outlined above, and over what timescale? When and how would funding from CARB-X support this pathway to impact?**

6. **Please identify the specific activities in your CARB-X project plan that will enable you to achieve your ODA-eligible objectives outlined within this justification form. Activities must be articulated in the project plan and include timescales and costs.**
